He would never say no to a good game of chess.CHESS.COMChess.com is built by chess players and fans who really love chess! Hello, chess players!- New lesson map- Animated pieces when captured- Lots of small updates and fixesHave fun! Read more Another Scrabble addict â The best chess app ever downloaded this app with a bit of skepticism, as I've tried many chess apps over the years, but found them frustrating. This, however, is in a league of its own (I have the paid version). My chess skills have skyrocketed, and my only complaint is that it's addictive! I'd like to see some additional options while the developers continue to listen to the feedback, as they do so kindly. Some tips: let the user which pieces were captured; add a button forward (for when we use the button back and then change our mind, sometimes Dr W sounds different when we do it); explain why sometimes it labels a move like a mistake (in the option "learn from your mistakes" after a game, game, is generally very useful). In that section, I would also like to see exactly what I played when I show myself the board of directors where I made a mistake. But for those of you who ask you if this app is worth it, I would also like to see exactly what I played when I show myself the board of directors where I made a mistake. Good for basics - Bewareai Buyer really enjoyed this app at first. I think he has a great approach to teaching a chess player from the start. I really like the format. However, in the end you hit a "pay wall" which can be frustrating. I was considering the purchase of the additional content/access .... and then? I was playing Dr. Wolf, and I was emptying out of control. You can't do that. Clearly a technical problem / bug, anything. But I'm not going to pay to play against a computer opponent (and pay for "Caching" from  $\hat{a} \in \alpha$ Him $\hat{a} \in \beta$ ). If it is sometimes programmer: check your logic to make sure the dott. Wolf knows the rules of calming and follows them. Update after the developers answer: I increased my 2-star rating, as the developer responded quickly and kindly to show interest in investigating the bug. I appreciate it as a user who is at their product. Unfortunately, I can't help over the hour of now, since I can't generate a screenshot from a game some time ago. While I spent many hours playing Dr Wolf, I think this problem is really rare, if it happens in the future, I will obviously try to be more available and save a screenshot (even a PGN). Thanks for reaching Back - If it happens in the future, I will provide better data to you through an email or something instead of an app review! ANCHIXOTE - â concentration of a concentra Unexperienced Level. The expert wolf is no longer a version of the advanced level that makes almost as much mistakes, although less embarrassing. When I launch a legitimate attack â cexpert of the end. Obviously there are only the end of the educational purposes to its sudden weaknesses, but a level of difficulty called how it should be a platform where highly advanced players can feel constantly challenged. I think it has a more formidable opponent who plays with enticing inaccurateness. After all, it is not, it is not an ideal role model for the most perceptive amateurs. In addition, the concept of "Strong Moves" is based on very spotted standards, evaluating my moves only in light of the principles of incidental driving and not the general strategy of the game. Not teachingI imagine. If the nature of the app's chess board would be more refined and flexible, this app would become more competitive. And if the learning opportunities and consistency of computer strength could be reconciled exceptionally, this app would become my favorite fav future update solves these, then I will change my review happily. First of all, when you ask for a suggestion on what to do, it does not often say why we should move this piece there, and it is not always obvious (although it might explain why it moved a certain piece or congratulated you to find an attacking or defensive position). The second is that the level difference between  $\hat{a} \in \hat{a} \in \hat{a$ and beyond offers a steeper learning curve when next is almost impossible for my skill level. I'm not sure you were the only one with this problem, but for my personal benefit after purchasing the Pro version (surely recommend), I would like to have this feature. Note: I haven't tried other teachers yet, hoping to beat Dr. Wolf First.Dream Surfin - it's only worth it for lessons, not actually playing chess the app has great lessons, my chess game has already been significantly improved with free ones! I still have to find an AI that doesn't cheat, or refuses to lose. I tried to win many games against AI here, and only won once. A game I had a tower, a queen, a knight and a bishop and the Ai only had the king. I should have been able to win that, right? Whenever I made a move with some of these that I would put his king in control with it loose AI would call a tie. I returned the move and tried to win with many different moves and angles and I got the same results. I am, however, able to beat the AI of other chess apps with strategies from this, when they do not stick. Edit: (in response to the developers' response.) Ty for letting me know that, as a beginner I didn't know that the rule on chess. I probably just missed it. Some of the other chess apps out there don't always apply that much. Maybe you could have Dr. Wolf explain it more often? Will I be sure to send screenshots of everything I have questions about.112233-? - Bad reviews come from FreeLadersBrea before getting this app, I only knew how the pieces moved. That's it. I went through all the lessons for beginners and then played a game against the Ai Set to ât œStrong for beginners. I've been able to defeat him, though with my coach every daythat burned me in the right direction and the ability to take some bad moves here and there. The amount I've learned is surprising. I enrolled for the \$4.99 / month which is only peanuts considering getting a â cocchaet that actually teaches you and establishes many exercises and issues when covering the lessons. I'll be fine.a math or music guardian would. If you do annually instead of monthly you will get it for less than three dollars a month. This is such a non-brainer. I took the free trial and saw the value right away. Not surprisingly, negative reviews for this magnificent app come from people who want everything for free. This is their main beef: "Waaa waaa is paying for the game, waaa waaa". How are they surprised that they have to pay for quality goods and services? These people go to a car dealership, enjoy their free trial, and then complain that they have to pay if they really want the car? Anyway, IA coaching here is good. An experienced patient and understanding man at your service 24/7. Exceptional for beginners.z Lemal - Five stars with a caveat! Overall this is the best app I found to learn more. My only complaint is that sometimes the tip button that shows you the best place to move does not make sense and there is no explanation for why this move was suggested. He once advised me to basically forgive my last lap and my queen and then his next move was the control partner. Unless it was a bigger lesson about listening to your instincts, I can't understand why it was useful! I would also like a button showing captured pieces. mactrek1 - Could be better. The game recommends moves, often correcting moves I made, but without explanation of why my move was bad or because the suggested move is better. Last night he suggested a move that would allow my pawn to be promoted, only to be immediately caught by the rook of my opponent. I found a better move that put his king in control, forcing his rook far enough to allow my pawn to be promoted and not captured. In general, I like the app and find it useful. I'm an advanced start that hopes to improve my skills. Once again, the explanations of the advised moves would be useful, perhaps even having the computer play through different moves from your error to demonstrate why it is a blunder, then return the card to a point immediately before the blunder. EHL1668 - Just ok not much learned I played chess up and out for over 20 years. I wanted a program to help improve. This application has coaches and games that are too difficult to win or too easy. The feedback is ok on the best moves to do, but the error review can eventually be confused because they suggest moves that may not make sense and leave you wondering why. Also, it does not enter the most advanced games and asreally tactical in the game. I've learned a few things, but I feel like I'm playing the same way without learning to improve. I played almost 400 games to rehearse. So I won't continue the subscription because the app frustrated and disappointed with very little progress or improvements. I'm gonna try something else. Mgdpub - Lacks some of the most fundamental features of a chess app How do you make a chess app and not show which pieces have been captured or which piece has been captured by the last move? It's mind-blowing to me that a high school com ski project would let us out figure out an app charging \$5 a month. There's no way to change the sides unless Dr Wolf is in the mood. It sounded a move that looked crazy stupid, so I wanted to change the parts and see his thoughts if I played the move I thought he should take. He can't do that. In addition, the tutorials are very limited. The concept here is great. I like the artistic style of the app and the chess newspaper. What about the bases? kitkatratings - Good app with potential I am a class B player of the USCF. I played advanced for about 20 games. What I noticed is Dr. Wolf does not necessarily play on an advanced level, but rather suggests advanced skills that he hopes to cover in the game. This does not mean that these opportunities will turn out. Dr. Wolf does not necessarily play on an advanced skills that he hopes to cover in the game. This does not mean that these opportunities will turn out. Dr. Wolf does not necessarily play on an advanced skills that he hopes to cover in the game. mistake or see something better. Either way, I made sure Dr. Wolf blushes the material he drops or gives his queen away for nothing. As for the evaluation, the 1500 is the USCF average and Dr. Wolf has me at 1055 when it is 1630 USCF. I won all 20 games so I don't understand why this is. This application has a lot of potential and I love the concept. I'd like to see these problems solved. BRYANT43 - Great application for learning Completed the process of the week - then signed. I love Dr. Wolf's artistic style and personality, I really feel like I'm trained. I also like how clean and simplified the user interface. Perhaps in the future there will be voiceovers and dialogue to allow a greater interaction with Dr. Wolf. \* A annoying thing that I noticed happen is a piece duplicates after I hit redo then move. It happened very often during a game. 5 stars. .. because this application completely changed as I see chess. The queen's Gambit aroused interest, but if it hadn't been for Dr. Wolf, I probably wouldn't have dug deeper. Chesster Knightly - Pretty Darn Good is a very well designed app. A very frustrating thing that happens a lot - in the middle of a game, I might need to lock my screen or switch to another app. When I return to the app, or get frozen on the main screen, or it is not frozen, but still on the main screen instead of continuing where I left. That's what this is.Stop using the app, and it's definitely not enough to stop me from recommending it to amateur chess fans!! Stewardh - a useful choice of lessons, the only chess application Interfacethis offers the feeling of actually playing against a live opponent, which offers the feeling of actually playing against a live opponent, which offers the feeling of actually playing against a live opponent, which offers the feeling of actually playing against a live opponent, which offers the feeling of actually playing against a live opponent, which offers the feeling of actually playing against a live opponent, which offers the feeling of actually playing against a live opponent, which offers the feeling of actually playing against a live opponent. be best summarized as a friendly and helpful chess application. We have a suggestion to consider for future versions: when showing a suggested move (using the option), briefly explain why the player should make this move. There are many levels available. All in all, highly recommended for valuable tips and lessons.nmzouk - dà advievi unreliable learn some chess from Dr. Wolf. The idea of a tutor is excellent, but the execution could be improved. The biggest problem is that it gives unreliable advice, which is worse than no advice. For example, a feature allows you to examine the mistakes you made during the previous game. Often it will identify a mistake, so tell you that the same move was the best move! If it's contradicted, then you have to suspect he's giving you bad advice when it's less obvious. After initially posting a more negative revision I was contacted by the developer, who said that I had identified a bug and committed him to fix it. I revised the review to be less critical waiting for it to be improved.sk8-4lyfe - great app that does not swallow but encouraged looking for an app to replace the Magnus app. He is not encouraging chess and is now surrounded by people who love only money. Money over chess does not take chess as a whole to the next level. You have to constantly pay for brain power. Which is to help you learn the best move. In over 5 years, the app would never strike a balance. That is ridiculous his AI to cry out loud. Then when your turn to win the app just crashes to keep your rating. I've been complaining for years. And it's always an unusual response. This app actually teaches instead of discouraging the art form. Almapa93 - I like a loti was looking for a chess game where I could play others but I saw this and thought I'd give it a chance. Played with my roommate and taught me a lot about chess but I wasn't able to play in Almost a year. This was really nice to go through a game and get trained with better moves. I made some perfect moves and trained me through this was a five-star review, but I wanted to see if I could change the design so it wasn't so 2D and if I wouldn't mention the review. Instead, I found out I can't play for free for very long. Don't I realize it was a pay to play and so expensive to do. Vlnvirtuoso - Absolutely loved! Make it stronger though. This is one of the best chess apps I've ever seen! Offers valuable insights while you play and so expensive to do. Vlnvirtuoso - Absolutely loved! Make it stronger though. all the experience lets you feel like youA true coach genuinely interested in helping you. My only complaint is that it's too easy to beat even at the highest level. I am evaluated around 1700 USCF and even the experienced environment is not terribly challenging. Please do the game force and will gladly sleep the monthly cost for the lessons. This is exactly the type of app I am looking for ha lila - Great, pair improvements to suggest the app in general. Couple areas for improvement: says some of the same things more and more often. (Å ¢ â, ¬ "I see, you are remodeled. Etc.) Irritant. It would also be nice if it was somehow visually represented which pieces on each side have been captured, the way you can easily see it during a live game. But Above all, it would be nice if the coach could emphasize my specific weaknesses. Nothing would help me improve how much. I was pleased to see the update but a bug was introduced. It doesn't recognize us more like a paid subscriber and not He won the bus. Can you solve? Soc5 - Fun way to learn Chessif You 'King a beginner like me Chess has a lot of fundamental ideas and tactics you should know to make sure you have a good base and this app is the best I played until now it's fun and guides you through the games in a way I have not seen other chess has a lot of fundamental ideas and tactics you should know to make sure you have a good base and this app is the best I played until now it's fun and guides you through the games in a way I have not seen other chess have a good base and tactics you should know to make sure you have a good base and this app is the best I played until now it's fun and guides you through the games in a way I have not seen other chess have a good base and this app is the best I played until now it's fun and guides you through the games in a way I have not seen other chess have a good base and this app is the best I played until now it's fun and guides you through the games in a way I have not seen other chess have a good base and this app is the best I played until now it's fun and guides you through the games in a way I have not seen other chess have a good base and this app is the best I played until now it's fun and guides you through the games in a way I have not seen other chess have a good base and this app is the best I played until now it's fun and guides you through the games in a way I have not seen other chess have a good base and the games in a way I have not seen other chess have a good base and the games in a way I have not seen other chess have a good base and the games in a way I have not seen other chess have a good base and the games in a way I have not seen other chess have a good base and the games in a way I have not seen other chess have a good base and the games in a way I have not seen other chess have a good base and the games in a way I have not seen other chess have a good base and the games in a way I have a good base and the games in a way I have a good base and the games in a way I have a good base and the games in a way I have a good base and the having fun playing games where now I understand how to start, what steps I should start with etc. If you are a beginner and how to pull them away etc. Take a look at Dr Wolf A ° A¿ A¿A¿A¿A¿A¿A¿A¿A¿AAA A¿A? michaeldavidthomas - tools, well executed chess tutoring approved pleasant gameplay and useful education. Dr. Wolf person is effective and pleasant. Just variety and personality to make motivating dialogue. Tutorials and opportunities for in-game learning are all very well made. My only cap would be the one in à ¢ â, ¬ Å "Reviewing errors" from the previous game, there could be more detailed not only on the alternative moves to consider, but because those moves were better choices. But this is a problem of High class. About the only thing I can really complain that I hate the app icon. Yes, no matter that this old man heads on my home screen. I am a serious professional human girl. Girl girl - beautiful learning ECONTCOR the only thing I can really complain that I hate the app icon. Yes, no matter that this old man heads on my home screen. I am a serious professional human girl. provides a favorable and favorable learning experience. Lessons and gameplay are symbiotic. To make the app still better, there should be deeper explanation, but other times the explanation is too superficial or completely absent. Clearly suggestions Considering the different gameplay steps in advance, so why not share the logic with à ¢ â, ¬ å "Studentà ¢" How would a live teacher? The game committee could also benefit from some 3D options to create a a Like-like.chloe74 experience !! - Almost good as a beginner in Live Teachen and a beginner and they used this app at least once a day for about a month. I love I have options: training on specific strategies, playing a match against Dr. West (who plays at my level,) and reviewing errors. You can also get suggestions or resume a stupid move. Although A ¢ â, ¬ ". WestA ¢ â, ¬ does not speak aloud, does a lot of comments that appear on the screen to strengthen what I am doing well or wrong. I highly recommend it.tgsavel - awesome - love it. Just a fantastic app. Sometimes I wish I could play on my laptop, because I don't have an iPad. Some of my comments for improvement or other similar ones. say that a certain move was the best move, they don't say because it would be incredible if you adjust it. Thank you all for all the hard work to put together this app. It's fantastic having a chess coach. Wikdjamamekdmsn - perfect for A strong benevinneri "Ve à ¢ â, ¬ å" Knare how to play chess since I was a child, but he had zero concept beyond the way the pieces moved. I improved 5 times a week since I started using this app. It is probably the perfect way to someone to my level of learning in an app. My only complaint is the cost. It looks a bit excessive for what you get. I probably pay for a couple of months, then cancel, since there is no enough content to make it a long-term subscription. Alpha Mailman - almost perfect, but an annoying bugi has a bug recording if the developers would like. Sometimes, it seems to happen casually, when you move a piece, leave a picture of the piece will be on A2, and there will still be a Å ¢ â, ¬ Å "Peace" on A1. It's just a picture of the Rook, and not You can remove it unless you start a new game. It's the only thing that holds me from a 5-star review.MB2007TEthrock! - Great way to learn and practice chess! It's like playing with someone who knows chess and You give you useful tips along the way. There are lessons available to help you along the way; becoming available while practicing new abilities. After an initial trial period there is a monthly fee; right now, it's worth it - even if I prefer a purchase option once. I don't like having to manage subscriptions. Overall it's an excellent / fun tutorial for a newbie chess like me! BlackjackHorsesperson120 - Best Chess Coaching Appi I think this is a great app! He really improved my chess game, and I think this a PP is perfect for beginners trying to learn how to play and learn some simple concepts. I really like playing with Dr. Wolf because you're playing him comments every move and gives helpful tips. And the Lessons Gallery really helped me a lot! I definitely recommend downloading this app if you want to improve how you play - I love this app, it has some bugs Love this app. He's really helping me improve my chess game. However, there is a bug where if you close the app in the middle of a lesson and try to return to the lesson, most of the time does not charge the tab or text. And right today, when he loaded, don't record my moves and I had to restart the application and fight the load problem again. I don't know if it's a server connection problem or something, but it's frustrating. hot4hypatia - Fails at many levels This application seemed decent at first, but it is severely defective. As many other reviewers have pointed out, only drop material for no apparent reason at some point, often putting a piece in prise. He also gives imprecise advice, for example, he has missed moves that often lead to mate faster than the move that it is a bad advice and won in 15 moves in a game and said I had made 4 mistakes! He had suggested Nh6 was a better move in a position where Nh6 has absolutely no meaning. There's no way to report these problems, I tried. You can also not save or review complete games. This makes me very suspicious as it prevents users from performing their own analysis of a game. Maybe Dr. Wolf's analysis is suspect? Also, how can you label this a teaching program when you can't even ask for an explanation or an eval engine? Finally, the evaluations are a joke. Read just a few of the other reviews. AML-Dad - I learned so much in a short time I was looking for a good didactic ches app. I found this and dumped with a skepticism. I was very happy with that. I've already learned so much in a short time I was looking for a good didactic ches app. I found this and dumped with a skepticism. expanded version. It's pretty nice how Dr. Wolf interacts with you when you make a move. It's like having a real instructor sitting through the edge from you. This application is a game change. I don't know much about chess, so if the app is teaching me a bad strategy, I don't know enough to tell you. But from a beginner point of view, I can say that it seems quite solid so far. I like how it will stop a game to tell you what you are doing wrong (or right). I don't know how "advanced" gets, but so far, I like the approach and will probably pay for a month just to see how much it takes me. Jsb2000 - Absolutely outstanding As a chess player the more I have always sought an application that can really help me learn to be better. Most of the applications they teach are written by highly qualified GM for highly qualified GM for chess forsome valuable knowledge. It breaks my game, shows me what I was wrong and drives me to better decisions. Great app, thank you. The fact that this is free is amazing, I always knew how to play pawns but never tried chess, until I was at school and there was nothing else to do, do, He didn't know how to play it and continued to cancel my moves, and when I returned home I downloaded this, the lessons and teaching are very accurate and helped me understand the basics within half an hour. I really recommend this app.i M really enjoying the Dr. Wolf chess app. I feel like I'm getting one-on-one personal lessons are interactive and easy to understand. Comments are provided on moves made during the games and you have the opportunity to analyze the game later and see where you could make better moves. I highly recommend this app! I'm a beginner, and recently bought the app for a year. I've learned so much, and I've almost doubled my rating since I left. I highly recommend it! A suggestion for the future: I would like to learn a handful of opening moves that could be practiced in the learning section and used in the game section. It would be a great addom ahead of an already great app. Climate the basic idea of being tutored while going through the games. I wish there was a way to know which lessons were completed, and how well I did in them. Starting now, when I do a lesson, it looks like the same thing before I did it, so I don't know what I did or I didn't. With this saying, I like that I can complete the challenges of the lesson simply by playing. It is authentic and feels natural to progress synchronized on multiple devices. On my phone, I have a lot of progress, but on my tablet, I have very little. I'd like to use my tablet, but if it makes me repeat the old stuff again, I don't see the point. Point chessguy111 - Very well done! I really like this application. As others have pointed out, the expert level is too easy. I am an informal player, and I can beat the expert without much difficulty. What's the he plays? If this application is designed for children, I understand the difficulty assessments. However, you need a setting for players who are over 1600 Elo4Checkmate92 - Good Learning Tool. This app is worth every penny. He helped me not only see my mistakes, but also improved the vision of the mt on the board in a tight situation that would lead me to lose. Pay the annual fee. It is cheaper and much more educational and pleasant. It will not only show you errors from your last game, but someone you did in PST games as part of the training. I love the app.LDS and proud - a great resource to build your skills and learn how to become better. This is a well-designed app with this gives you all the chances you have to ruin yourself, so you canWith person security. I have other chess apps downloaded too, but only so that I can have more chess apps downloaded too, but only so that I can have more chess apps downloaded too. but actually teaching along the way while playing you gives you infallible advice on opening. Push King Pawn, Bishop, Knight, Pedestrian Regina, Bishop, Kni specific, and shows it. Wills Farm - Best Chess App This application has increased my game and transformed a little novice to someone who went and bought her set. I learned everything from the opening of moves, promoting and developing pieces to specific strategies. They are no longer intimidated by the game, but I can't wait to use the skills I learned. Thank you for the construction of an incredible app and the construction of my trust. Red Blue Green - Entertainment I didn't play so much chess with other applications as I have with this. I like the style, the ability. It's fun! I have the free version and I'm thinking of subscribing to report the coaching that I had during a free trial period. Just a pawn - Learn a lot of played chess when I was younger, but he never had any formal education. Start from a very fundamental level and move to more difficult arguments. Assesse is the level of ability and regulates the game to test new competences. Error reviews from previous games Give you the opportunity to understand where you made a wrong move and because. Cerallobstera - best chess coaching app I have seen so far are terrible chess and have tried many times to enter it. Dr. Wolf is the first time I felt like a player and my functional knowledge was improving. My only problem so far is that when looking at the errors of previous games, Dr. Wolf puts too much importance on forking. Many times you will tell you that the best move is to fork two pieces even if you put your piece of fork just for having forged two pieces. If I understood why he was weighing so heavily, I would give them five beginnings, but or lose weight the best moves or the lack of clarity about why it is the lack of clarity about why it is the best moves or the lack of clarity about wh period is all that it takes to convince me that it's like no other chess coaching tool. It is very effective! I expect a 1-year subscription to greatly improve my game and my rating. Most of a good Chess app ever! I tried many that is maintained by the student. JRB333 - Best chess app ever! I tried many effective! I expect a 1-year subscription to greatly improve my game and my rating. chess apps. Dr. Wolf is by far the best to learn and improve. He seems to me to have been trained by a real chess coach. The cost of the subscription is much better than payment in Chess lessons, too. Having done in lessons in person before you can say that Dr. Wolf works best for me. The best thanks to developers. I love this app.Stephpegasus - it works well, a disappointing is the enjoyment of the app. It works well, as a beginner I like that reviews games and coaches while playing and I decided to get the subscription. My only disappointment is that the premium content cannot be shared, so each family member must have individual subscriptions even if they download it through family sharing. Free2Choose88 - Great Help for Newbs The lessons really helped me develop my game as a total newb. I think a purchase of a moment would be more appropriate. I paid for a month, and I got all the material in the lesson. In my estimate the coaching function did not amount to another \$5 + per month to keep the subscription. Grateful for the tool that helped me get started but will move to Magnus Trainer to continue my learning. Hanihani36 - Better than a real chess instructor! I've been trying to collect chess for years, but I've always lost interest, until I found this app. I like to learn from a real live chess instructor who guide you through everything from basics to advanced strategy. I can't believe how much I learned while having fun! Enjoy maximum maximum transfers in more than 20 currencies saving up to 90% on local banks! The economical and fast way to send money abroad. Free transfer up to 500 USD! Wanderm - Best in A (not existing) If you're learning chess, Dr. Wolf will be a great booster. I should come out of my perspective. There are resources that will teach the rules, and there are resources that are quite challenging for a semi-serious player (say fide 1400+). From there is little valuable. Dr. Wolf is destined to fill that gap and everything while I enjoy playing a new and unique game! I am an advanced beginner (as I write ~ fide 1000) and I need help with tactics. Dr. Wolf won, tell me that every tactic (ches is a difficult game, people) but I really like it when the app offers its comments. I have a feeling that there will be more to come, although if ever arrive at 1400 (which certainly is a goal) it will be time to switch to the typical resources. Another great tool for the United States patzers is of course the regular game, and there might be cheaper options if you improve through competition. Siddtarth1330Com. - Churidi has actually won all the games from my father at the age of 9 I have 10 you know so I am more eager to chess so I always want to play chess but my father is busy and I can therefore, learnt, but when I knew I can have a free online that tells me my mistakes and tells me that my strong moves and my weak moves I think this is amazing, please download this app if you have a chess addiction .Logismiko - To so advanced! It's easy to forget that Dr. Wolf is an AI. This is the first bot I've ever interacted with and andbeen painfully aware that it is just a stupid computer program. I could also say that I admire and watch Dr. Wolf and his mastery of chess. In-game coaching occasionally lacks explanation as to why a certain move is better, and sometimes the suggested move doesn't seem at all better; that is, unless it's just not explaining why it's. 3 Dog Legged -Best Chess App I downloaded and played a variety of chess coach aps and this is definitely the best available. My game has improved and the game review is excellent. The app really plays at the correct level ranging from "sinner's mistakes" to chess master variations. If you want to learn chess or improve your game this is the app to buyJeffsyg -Fantastic Teaching appFantastic Teaching app. Well done, it was a huge help for me and I already improved dramatically. It's pretty hard to believe sometimes that the incredibly helpful and friendly guy you're playing isnt a real guy who coaches you and give compliments/commitment along the way. The best chess coaching app ever. Cheersm&salltrades - Great way to learn I never leave reviews, but I had to leave one on this I played a bit of chess with my teammates, but no formal training this app has brought me to a pretty respectable level in about 3 weeks... I win every game against my friends easily. Soccernic - Good option for permanent opponent, but you need to pay for a coach I initially thought this would be an excellent five-star coach app, but then the coach disappeared unless I paid \$47 for the 'free trial'. I'm not doing that. A little disappointed. Also, I found out that I was encouraged by good moves only to be crushed the best move. It is not ideal to be congratulated for a correct move and then lose instantly. Awesome app for a rough beginner like me. He made me enjoy it every time I take it. It's only been a week and I'm already at a level now where I feel I have a certain amount of control which is very rewarding. It is an excellent app for chess tutors, in fact it is a superbly designed full stop app. Intelligent interaction, top tips and explanations, and Dr Wolf is a great original character. It helped me a lot. This application deserves a wide audience.nicccooollllle - My chess gameEvery day I play a couple of fun and hope to improve. Thank you AnnaViolinman. - Very useful This is very well designed, and seems a real interpersonal help. Best chess app I've seen so far.911-87 - Great game with useful tipsVery smart and available training module During some lessons, the They magically duplicate. I had as 6 kings in companion with lesson QueenMilly1293746381 - Best teacher ever! Dr Wolf - I'm in love . you're a great teacher. So supportive!!! Thanks to millionFabt92 - I think this application is greatGreat app!M-Lami - Excellent Chess Game Thanks for Dr. Wolf. I love it. Lack flexibility in creating positions or orand Daddy - Awesome chess gameWondering how you could earn \$25 simply by enrolling? Earn \$25 free by joining Payoneer. Sign up! - Excellent. I wanted to learn how to play correctly chess for years, and this application practically covers it for me. Good lessons and advice, really nice. \$6.50/month is just bad for both the monthly cost, or \$4/month for a year is reasonable, too, considering how much a real instructor would cost. never being able to get any better in this hellish game, despite buying dozens of books and applications. This little chestnut of a program has changed everything in a handful of days. They are always leery of "in-app purchase," but the deal here is that you go through enough training and practice to improve, and then you decide if you want to subscribe. No announcement for other drug addicts. I was sufficiently surprised by my progress (especially being forced to be systematic, and then asked by Dr Wolf the second I did to pieces) to opt for membership. It was only days ago. They're already jumps and limits in front of where I was even then. I love lessons, instant feedback, brilliant writing in everything (thanks, writing team!), and innovations such as invitation to exchange sides whenever you do something stupid, designed so you can observe how obvious your gaffe was at the opponent. Really tripping and educational. This only has greatly improved (what I know is called) my vision of the council. Bless Dr. Wolf. I'm happy hooked and hard. Checkmate! Abithilliam - The best app ever! / Application of sequins! A very concrete application where each move is very well explained. Being an intermediate player, learning by viewing moves with a good advice is essential. You never feel lonely. for less than \$1 per week, you have a lot of content. buy without hesitation. If I could invest in this company that offers these applications, I would do it without hesitation. Weaslemun - New update broke my subscription? Hey, guys, love your app. I used it for several months. I went to play today and I was surprised to see Dr. Wolf thought I wasn't in writing when the App Store says the feb expires 2022... I'm using an old version of IOS on an old phone. It's been a long time on the subscription! Please fix it. Chess235 - Key Move Missing You can't set your king and king in this app. It doesn't make much sense not to add this move. Big fat dava! - Pay to learn how to lose paid 50\$ to learn how to lose it's gross. Big Daddy Peen -that was better I'm about 1900 on evaluation on most applications and even on expert dr wolf a better player, I would like to be able to flip the table, helps me play MagerGood Teacher You came here!!! Cmdinosaur - Now I can't play Chessi The chess, now I can't play Chessi The chess, now I can't play a little. Methodical instructions that.Builds on techniques. Covid Stress for the creation of a chess program. This program was very valuable because of our second Covid block. Provides learning chess because playing at different levels. Thanks, Clemtry Another Run APP - As but not for this reason to be basic as for a beginner, but it really doesn't explain why to better understand and track moves.mykwest simply friendly tutorial with motivation Explanations: a great way to learn. Love this app. Super for beginners or for those who want to tune their game. Works perfectly and coaching on the purchased package is fantastic and worth it! Calpinkney - a little annoyed. App provided a free trial with the stipulation that I could confirm or cancel the subscription from 11. However, the app has confirmed my description of this. day. Clearly, the app may communicate the confirmation date of the best subscription. Mattyd99999 - Very impressed by Dr. Wolf! I told everyone how this noob is so good so fast and it's thanks to Dr. Wolf! I just started playing chess and learned so much. He can't wait to know more. Great job on the Guys app! Great interface and interactions! It's world class! Clementins - Merci Chessmonsieur Le Professeur J Ai 93 Ans Et Quand Je Suis Fatica The concentrationm Echappe...metiers divers Marin Ecrivain Poete Peintre Sculpteur Sensei Plus de 40 Ans Dai ki do en France Espagne Mexique Goa en Index Mc Gill Universite in Montreal Vie Intensentment Interest Marie Depuis 72 ANS J Aime Les Defis Je Parle Couramma 4 Langue Et Me Debuille Assez Writing is impressive. Dr. Wolf seems like a real person. The app really helped me improve my chess. The training is good and when you are playing "real" you can always ask for suggestions. I wish there were more training. I finished it all in two months... and now it will pass into another app just because I feel like I need more training, more tactics, strategic training, please let me know! StandardTvt - good for NewbieShas helped me start with this game. However, he always tells me to stop the training, and Find something else to do when I'd rather continue to train! But this is good because I take it away with things and burnout.virilitas - fun and interactive really enjoyed using more pieces than that actually exists (for example 3 bishops during the fork lesson). Otherwise this is a very useful application to learn chess. Low carving Yukoner - love this app! Best Mai! Personal coaching. Positive workout! Easy to use! No glitter! What else can you ask!?!? Try it, you like itapp lover 73628 - excellent for payments if people paid, this is really a nice app. The advice is nice, the app is really good, and there are many opportunities to refine your ability. However, \$ 35 a month is too much for me. Robertlav - Friendly Chess Coach Thanks. Mr. Wolfsimonnillo - Excelente Para Aprender No The God Las 5 Estrellas Porque en Epocas The AplicaÃ<sup>3</sup>n If Bloquea. De the opposite es the mÃjximo para quieres queremen aprender. Really fantastic application! My chess chess greatly improved! Well done app. Good graphics, well-weighted and engaging lessons! It is a charismatic type. Maybe it's my neuroses to talk, or I didn't learn to "let go", but sometimes it suggests moves that look disadvantageous and I don't feel safe about why. Start your future on Courusera today!
